[illegible]

This exploded view diagram illustrates the assembly of a cable management system. The components are numbered as follows:

- 1:** A rectangular plate with four circular mounting holes, serving as the base for the system.
- 2:** A cylindrical component, likely a cable clamp or connector, shown in two positions relative to the plate.
- 3:** A cable with multiple conductors, shown in two positions relative to the cylindrical component.
- 4:** A cable with multiple conductors, shown in two positions relative to the cylindrical component.
- 5:** A coiled spring component, shown in two positions relative to the cable.
- 6:** A small, rectangular component, likely a terminal block or connector, shown in two positions relative to the cable.

The diagram shows the assembly process where the cables (3 and 4) are connected to the terminal blocks (6) and the spring (5) is attached to the cable (4). The cylindrical components (2) are then mounted onto the plate (1) to secure the cables.

This exploded view diagram illustrates the assembly of a multi-channel cable system. The components are numbered as follows:

- 1:** A large rectangular panel with six circular ports, serving as the main interface plate.
- 2:** A cable connector with a braided shield and a locking mechanism, designed to fit into the ports of panel 1.
- 3:** A multi-core cable with a braided shield, connecting the main cable (2) to the multi-channel connector (4).
- 4:** A multi-channel connector with multiple individual ports, which will be connected to the individual cables (5).
- 5:** Individual multi-core cables, each with a braided shield and a locking mechanism, designed to fit into the ports of connector 4.
- 6:** A small cable connector with a braided shield and a locking mechanism, likely for a ground or auxiliary connection.

The diagram shows the spatial arrangement and alignment of these components for assembly. Dashed lines indicate the intended paths and connections between the parts.
